

Notice of *ex parte* Conversation, WT Docket 02-146, RadioSoft

This is to notify and all interested parties that during a telephone conversation with FCC representatives Pat Rinn and Sandra Danner on June 3, 2004, the subject of coordination services in the millimeter-wave registration database arose. FCC advised us that any further discussion on this topic would be subject to *ex parte* rules, at which point we stated that it is our policy generally to agree with the WCA reconsideration petition which asks, *inter alia*, that coordination services be required. FCC then reminded us that it would be necessary to post this notice. The conversation then turned to unrelated details of lateral sharing of data between database providers and other topics not relevant to *ex parte* proceedings.
